DATA SHEET

VERISIGN® IDEFENSE® VULNERABILITY MANAGEMENT SERVICES

THE EVER-GROWING COMPLEXITY OF INFORMATION TECHNOLOGY SYSTEMS, AND THE INCREASING COMPLEXITY OF CYBER THREATS, CONTINUE TO PUSH THE LIMITS OF INTERNAL SECURITY TEAMS, AND SOFTWARE VULNERABILITIES IN THESE CRITICAL SYSTEMS CAN INCREASE ORGANIZATIONS' RISK PROFILES. VERISIGN IDEFENSE SECURITY INTELLIGENCE SERVICES PROVIDES PROACTIVE, ACCURATE VULNERABILITY INTELLIGENCE THAT HELPS INFORM AND PRIORITIZE INFORMATION TECHNOLOGY SECURITY OPERATIONS.

Every day, security researchers discover vulnerabilities of varying severity in critical IT systems, making vulnerability management a critical component of every enterprise's security policies and procedures. Every day, damaging malware attempts to take advantage of these software flaws. Staying ahead of vulnerabilities means staying ahead of malware and other threats.

Verisign iDefense Security Intelligence Services provide around-the-clock access to accurate, relevant and actionable cyber intelligence to support vulnerability management decision makers.

Expert human intelligence

Verisign iDefense boasts more than 45 full-time, dedicated cyber intelligence analysts who are experts in vulnerability discovery, analysis and alerting. In addition, Verisign iDefense offers customers access to an extended network of more than 600 security research contributors worldwide, who provide iDefense customers with zero-day vulnerability information and current intelligence on emerging regional security threats.

Relevant technical intelligence sources

Verisign iDefense gives customers access to world-class researchers in vulnerability discovery, analysis and alerting. Verisign iDefense researches, collects and analyzes relevant and critical software vulnerabilities in more than 30,000 products from more than 400 technology vendors.

Integration-ready feeds

Internal security organizations can only benefit from integrating relevant cyber intelligence from Verisign iDefense into their existing security management tools and platforms. Correlation of Verisign iDefense intelligence, supports automated threat prioritization based on severity, business criticality and relevance to the organization. Verisign iDefense offers integration with Archer™, ArcSight™, Agilience®, Skybox® and QualysGuard® VM.

MULTIPLE VULNERABILITY MANAGEMENT SOLUTIONS

Verisign iDefense provides multiple distinct products to enhance customers' knowledge of the vulnerability landscape:

Verisign iDefense Public Vulnerability Report

iDefense provides customers with around-the-clock coverage and notification of burgeoning vulnerabilities and exploits that target any of the more than 30,000 products from over 400 vendors. iDefense analysts provide primary and secondary analyses of new vulnerability exploits, working in a rapid-response system designed to ensure timely notification of exploits. iDefense public vulnerability reports chronicle the lifecycle of each vulnerability, including availability and effectiveness of exploits, workarounds and patches.

Verisign iDefense Zero-Day Vulnerability Report

iDefense provides vulnerability details to customers before the vulnerabilities are disclosed publicly, giving customers a head start on malicious actors. Verisign iDefense has delivered more than 1,200 of these vulnerabilities.

Verisign iDefense Patch Tuesday Report

On the second Tuesday of each month, Microsoft® regularly releases its monthly security bulletins addressing vulnerabilities across all of its products. To assist customers with the prioritization of patching, Verisign delivers a post-release summary report which summarizes the vulnerabilities and highlights those which Verisign believes customers should prioritize.

Verisign iDefense Vulnerability Summary Report

iDefense delivers a summary dashboard to customers on a weekly basis that includes vulnerability topics and trends from the previous week.

KEY BENEFITS

Stay 100+ days ahead of threats

The only way to guard against cyber attacks and malware infection is to identify potential threats before they become active threats. Verisign iDefense regularly provides deep analysis of software vulnerabilities more than 100 days, and in some cases more than 200 days, before public disclosure. Staying ahead of vulnerabilities means staying ahead of threats.

Know which threats matter, and which ones don't

Detail and context determine whether or not a threat is relevant to your organization. Relevance can help decision makers prioritize threats and respond in the most effective manner, allowing security teams to focus on the relevant threats and avoid unnecessary emergencies and costly "fire-drills." Verisign iDefense helps decision makers avoid information overload by aggregating and evaluating information about the most relevant threats.

Strengthen your security team

With Verisign iDefense, internal security teams have one of the world's most experienced multinational cyber intelligence networks at their fingertips. The Verisign iDefense team works as an extension of their customers' internal security teams.

Intelligence from the recognized leader in cyber intelligence excellence

The industry has repeatedly recognized Verisign iDefense as a leader in vulnerability intelligence:

- Frost & Sullivan awarded Verisign iDefense "2012 North American Product Differentiation Excellence of the Year Award in the Vulnerability Research Field"
- Verisign iDefense was highlighted in the IDC Report "Worldwide and U.S. Security Services Threat Intelligence 2011-2014 Forecast: Out of the Basement and into the Clouds."

ABOUT VERISIGN® IDEFENSE® SECURITY INTELLIGENCE SERVICES

Verisign iDefense Security Intelligence Services gives information security executives access to accurate and actionable cyber intelligence related to vulnerabilities, malicious code and global threats 24 hours a day, seven days a week. Verisign iDefense in-depth analysis, insight and response recommendations help keep businesses and government organizations ahead of new and evolving threats and vulnerabilities.

ABOUT VERISIGN

VeriSign, Inc. is the trusted provider of Internet infrastructure services for the networked world. Billions of times each day, Verisign helps companies and consumers all over the world connect between the dots. Additional news and information about the company is available at www.verisigninc.com.
